Additional Information

Application Preference : (a) I Prefer only full-time M.S./Ph.D. at IITM.

Statement of Purpose : My interest has always resided in turning problems into products that led me choose Computer Science and Business Systems for B.Tech over CSE due to its unique blend of both core CS subjects with management fundamentals. As Management Head of college club BLOTIC, I managed a 100+ member team, handling events, budgets, and coordination. I am also pursuing IITM BS Degree in Data Science, currently in Diploma Level, further deepening my analytical knowledge. Women's safety -a crisis NCRB records at one crime every 1.2 minutes. This pushed me to research, propose a solution at DIAT DRDO Pune, got selected as intern and built a gesture-based distress detection prototype with false-alert minimization. Prof. Seshadri's work in deep-tech venture building, Mr. Gopal Raman's strategic industry leadership, and Prof. T. Pradeep's research-to-startup journey align directly with my goal of building functional, trusted, and scalable technology. IIT Madras is where I aspire to grow further.
